

"I have been working with College of Dupage in Chartwell's, the school's cafeteria, for over 15 years. We've had the cash registers that we purchased from TEEPOS that same amount of time. We recently had to call TEEPOS again, because those 15-year-old cash registers needed to be replaced. We also opened up an Einstein Bros. Bagels in another part of the school, for which we needed two new cash registers. We received the funds we needed from COD, and with the help of the TEEPOS staff we chose a convenient Casio touch screen cash register system. The best part about it was that they programmed everything into the cash registers for us! They brought everything in right away, also, which gave us a week or two to do testing and training before we opened for the summer. The new system is great because it is so much simpler and saves us a lot of time. Everything is programmed so we don't have to do hardly any typing compared to before. The staff trained us on usage and reporting which went well, it just took us a little practicing to get used to the completely different and new system (They are patient with us, which we appreciate). They even offered to come in a week before we open for the fall to do some final testing and make sure everything is ready for opening day. We hope to continue to be long-time loyal customers of TEEPOS!"
