

"I discovered TEEPOS while stuck at a red light in some serious traffic. I was in the process of opening a brand new supermarket and it couldn't have been better timing for me. When I looked into what TEEPOS had to offer, it was not the most expensive nor was it the cheapest product. I was looking at the Toshiba hardware paired with the Logivision software and the CAS scales from TEEPOS although, I was looking at 2 or 3 other dealers as well. But TEEPOS seemed to be extremely willing to work with me. I had older equipment that the new equipment had to be compatible with. TEEPOS was able to work with what I had which, even though they had average pricing, saved me about \$6500.00 in the end! They finished programming and then came in well in advance before opening day to install. The training and installation went very smoothly. I was more than satisfied with the whole process and I am continually satisfied with the servicing. There is no doubt in my mind that I would work with TEEPOS again!"
