

"I have been a customer of TEEPOS for 9 years now! It's been a long time, but I recall seeing a TEEPOS sticker on the back of a POS screen somewhere downtown. This is how I learned of TEEPOS and, in time, ended up working with them. The staff was nice to work with and made you feel comfortable. I was looking for a system that would work for a convenient and grocery store, but could also keep up with the capacity of what the store would become. I needed a POS system along with some type of deli scale.

The team of staff I worked with was not only good to work with, but they would bend over backward to get things done. Anytime there was an urgent matter, they made it a priority and, in general, they made us a priority. Another positive was their location; having them so close by was convenient. I have been very loyal to TEEPOS for these past 9 years and have gone through many upgrades to different versions of the same system. I appreciate the honesty from sales representatives through open discussion of whether TEEPOS platforms would be beneficial to continue with in the future and this is why TEEPOS would continue to be in consideration for my future business POS needs."
