

"A friend of mine and a fellow business owner mentioned TEEPOS to me about 7 or 8 years ago. I was talking about the fact that I needed a POS system for my convenient/liquor store and he said to go and talk to TEEPOS. I was looking for something that would give the store a modern edge but more so something that could manage our inventory and process customers as fast as possible. I met with a sales representative and they explained everything to me and were very convincing in making the system seem effortless. We decided on the TEEPOS software with Touch Dynamic hardware and a display to present prices and ads to our customers. I was then able to test drive the system, which was a pretty quick process that only took a few days and there were a few things that we were able to work out during that process before bringing the system into the store. The installation went very well and they worked around the hours we needed them to. TEEPOS always did what was convenient for me, so it was incredibly easy for us to work together. This system is very efficient and helps me to manage my inventory and I've gone through a few upgrades along the way to keep the system updated. I've had some issues over the years, even at my other businesses with different equipment, and TEEPOS was always able to help me get through them in some way. I would absolutely work with TEEPOS in the future and actually have worked with them on some things for my other businesses already like a new credit card machine at one location. The number to the TEEPOS store will always be saved in my phone!"
