L-BOSS – System features and options

L-BOSS is a set of comprehensive and easy to use tools designed for database control in retail environments. System features allow retailers to use their data to make smart decisions and reduce operating costs. L-BOSS will provide you with great data management whether you run a hypermarket with multiple POS terminals or a small gift shop using a single front-end electronic cash register.

Basic features
- Data exchange with front end POS terminals.
- Item file maintenance.
- Report builder.
- Task scheduler.

Optional modules

EJ and L-Tracker
- Transaction search & review
- Reprint past transactions
- Drill down functionality to locate data with L-Tracker

Lane Monitoring
- Split screen mode allows monitoring multiple L-POS terminals concurrently.

Accounts Receivable
- Account balance on L-POS terminals
- Charge sale stub receipt printing
- Full invoice printing
- Statement printing with interest posting

Inventory tracking
- Purchase order (PO) generation
- Stock receiving based on PO
- Hand held device compatibility

Price Batch maintenance
- Promo batches (start and end dates)
- Automatic resolution for conflicting date ranges uses Best Price system

Label printing
- Print labels from the same database
- Print price tags, shelf labels, talkers, etc.
- Print labels based on price changed items, batches, receiving, etc.

Rental tracking
- Ideal for video rental in c-store
- Reports available on late returns

Preferred shopper tracking
- Points issuing and tracking system
- Price level and discount by shopper type
- Item purchase tracking per customer

Backend balancing
- Entry module for cashier loans, pickups, declarations
- Allows posting transactions to previous dates

Portable terminal interface
- Rs232, RF, and wireless 802.11 devices
- Price verification, changes, label print
- Receiving and stock count functions

Price checker interface
- Real-time database access for each item scanned ensures price accuracy

General ledger interface
- Transfer data to general ledger system
- Posting to multiple revenue accounts (department, sub-department, etc.)

Remote data transfer
- Data exchange with headquarters system for sales upload and price download
- Polling can be schedule, per day, per hour or faster.

ECR interface
- Program information and send to ECR
- Retrieve sales reports from ECR

System requirements
- Windows XP, Windows 2000, Microsoft SQL Server or MSDE.
- PC PIII 700 or greater recommended with 256meg ram and 30gig hard drive.
